

Dear Student,

Greetings from SmartBridge,

Your team has successfully enrolled for the project. Please find the team details below

Team ID : NM2023TMID09301

Team Size : 4

Team Leader : RAMYA G D

Team member : MENAGA S

Team member : Narmadha.P

Team member : RAVEENA M

Regards,
Team SmartBridge

Parameter

Steps to Create a Parameter in T

Step 1: To create a parameter, click on the drop-down arrow present on the top right corner of the Data pane. Select Create Parameter option from the drop-down menu.

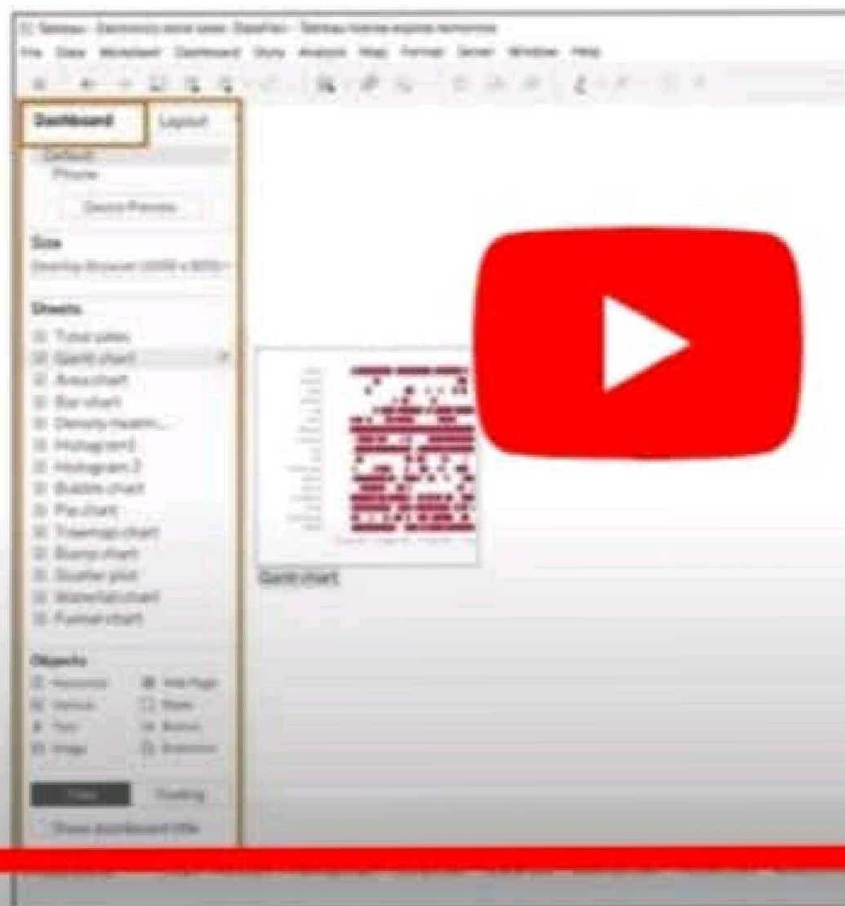

1:04:17 / 1:04:17

DashBoard pane

In the window where we can create our dashboard, we get a lot of t
the left, we have a *DashBoard* pane which shows the dashboard size
objects, etc.

Flask

What is Flask?

Flask is a micro web framework written in Python.

It is classified as a micro framework because it does not require particular tools or libraries. It has no database abstraction layer, validation, or any other components with pre-existing third-party libraries providing common functions.

To use Flask we need to install the library

Using “pip install flask”
